

Small Grant Facility (SGF) Projects

The SGF process is managed by the Maldives UNDP country office. Several SGF proposals have been submitted to the National Coordinating Body.

Current SGFs in Maldives:

Project title:	Project on strengthening waste management system on Noon Manadhoo and greening the island
Location:	North Manadhoo
Project description: (max 100 words)	This project has been designed to protect the fragile environment and keep the island clean and green by managing waste in an efficient and environmentally friendly way and by planting trees near the shore area. Further, this project will help raise awareness in coastal communities through environmental awareness raising Programmes which includes; displaying billboards around the island with environmental messages. The tree planting will also help reduce beach erosion.
Budget (in USD):	25, 000
Duration:	6 months
Implementing Agency(ies):	Daily New Construction
Contact Person: (name & email)	Ibrahim Aslam Aslam0250@hotmail.com
Programme of Work Relevance:	POW 2- (2.2) POW 3- (3.1) (3.2) POW 6- (6.6) POW 9- (9.3) POW 11 (11.4)

Project title:	Establishment of a proper waste disposal site
Location:	Hdh. Vaikaradhoo
Project description: (max 100 words)	<p>The aim of this project is to provide a healthy environment for the community. The root cause of many problems is that there is no waste management center on the island. The issues that arise are, mosquitoes breeding, spreading different diseases on the island, environmental problems occur on coastal area as people are dumping garbage, throwing away waste on the wetland and the bad odor on the island which happens after burning. This has further lead to a loss of unity among community as there is no specific area for dumping.</p> <p>The objectives of this project are therefore to:</p> <ul style="list-style-type: none"> ▪ Manage waste on the island ▪ Community to dump waste on a specific area ▪ Make the community aware socially ▪ Destroy waste in a productive manner ▪ Protect coastal areas and the wetland from waste ▪ Increase job opportunities ▪ Take responsible for providing information to the community
Budget (in USD):	11672.45
Duration:	8 months
Implementing Agency(ies):	Ilastrious Happening of Arts (ILHAAR)
Contact Person: (name & email)	<ul style="list-style-type: none"> • Abdulla Ashraf • Ahmed Waheed • Ahmed Solah <p>ahmeds@ologline.com</p>
Programme of Work Relevance:	<p>POW 2- (2.2)</p> <p>POW 3- (3.1)</p> <p>(3.2)</p> <p>POW 11 (11.4)</p>

Project title:	Environment Awareness Media Project (EAMP)
Location:	DhiTV platform daily from 6:30 to 13:45 hrs and Pod cast for Programme downloading
Project description: (max 100 words)	Irresponsible behavior such as littering, dumping of waste, intentional destruction of mangrove trees, reclamation of mangrove areas, negligent fisheries actions are often related to ignorance, short sightedness and lack of awareness on the importance of such habitats. The Environmental Awareness Media Project (EAMP) is aimed at addressing the above issues and proposing solutions and giving due recognition to those activities by NGOs and other groups at local and national level. The project will produce an interactive weekly radio magazine show titled 'Green Journal' including producing, gathering and distributing high quality audio-visual materials to support public awareness of these crucial issues. The project will also produce an original environmental song album performed by well known artists and lyricists. The songs will be available to other broadcasters free of charge to be used for educational purposes. Similarly it will also produce 3 video spots for open use by media and others for creating awareness.
Budget (in USD):	24,890
Duration:	6 months
Implementing Agency(ies):	DhiFM radio Station/ Maldives Media Company

Project title:	Increasing awareness on proper waste management
Location:	Ha. Hoarafushi
Project description: (max 100 words)	Among 480 houses on the island 2 waste management centers has been built on the east and on the west side of the island. However there is no mechanism to out flow waste when it's full. Garbage is visible all around the island, and the air gets polluted when non-separated waste is burned openly. The only way to minimize these issues is to make community aware by building capacity to manage it. This project aims to protect coastal areas and the environment, to minimize the garbage on the island, and to promote recycling items in order to protect the fragile environment.
Budget (in USD):	10, 330
Duration:	12 Months
Implementing Agency(ies):	Ha. Atoll School Isdharivarunge Jammiyya
